DETAILED ACTION

Allowable Subject Matter

1. Claims 1-26 are allowed.
2. The following is an examiner's statement of reasons for allowance: Applicant's arguments filed 11/03/06 have been considered and are persuasive, the prior art cited does not anticipate individually nor teach in combination the following limitations:
 - A backlight assembly comprising: a lamp to, generate light; a fixing member having a base substrate, a fixing clip protruded from an upper surface of the base substrate so as to fix the lamp and a first fixing portion formed by partially cutting-away the base substrate; and a receiving receptacle to provide a receiving space in which the fixing member is received and to have a first fixing protrusion inserted into the first fixing portion, so as to fix the fixing member to the receiving space.
 - A lamp to generate light; an electrically conductive fixing member having a base substrate, a resilient fixing clip protruded from an upper surface of the base substrate so as to fix the lamp, and a fixing protrusion protruded from an upper surface of the base substrate so as to prevent the lamp from moving in a longitudinal direction of the lamp; and a receiving receptacle having a receiving space in which the fixing member and the lamp coupled to the fixing member are received.

Art Unit: 2875

- An LCD panel to receive light from an external and receive an image; a lamp to generate the light; an electrically conductive fixing member having a base substrate, a resilient fixing clip protruded from an upper surface of the base substrate so as to fix the lamp and a first fixing portion formed by partially cutting-away the base substrate; and a receiving receptacle to provide a receiving space in which the fixing member is received and to have a first fixing protrusion inserted into the first fixing portion, which is protruded from a bottom surface of the base substrate, so as to fix the fixing member to the receiving space.
- An electrically conductive fixing member having an electrically conductive base substrate, an electrically conductive unitary resilient fixing clip extending from a first surface of the base substrate, the fixing clip configured to fix a lamp to generate light, and a first fixing portion extending from an opposite second surface of the base substrate, the first fixing portion configured to fix the fixing member relative to a receiving receptacle

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
